

## JBL L57 Carnival & L59 Festival

assembly, wiring, & operation

The JBL Carnival and Festival are the first loud-speaker systems designed to give full bass, distortion-free treble — true high fidelity performance — indoors or out. All exposed parts of the loud-speaker components and enclosure are water resistant. Even if your system is accidentally splashed or rained on, its performance will not be affected. Use it in the playroom or den, take it outdoors with you for patio siestas or poolside parties, plug it into your high fidelity system, tape recorder, television set or sound projector. Use it anywhere and everywhere. Enjoy exciting JBL sound wherever you go.
