

KHARMA

OWNER'S  
MANUAL

Beauty is in the eyes of the beholder  
Like a genuine piece of Art can evoke the  
special feeling of beauty and Emotions  
The subtle vibrations that a Karma  
systems offer are capable of steering up  
these deep personal Emotions, which  
have to be Experienced to be believed...

Don't take these words for granted  
Let go, Indulge and Enjoy an  
endless Journey beyond Imagination

Charles van Ooster  
CEO Karma

## *Awaken your senses*

You are now the proud owner of a beautiful handcrafted Kharma cable. A proper installation of the cable will give you all the indulgence you may expect from a Kharma product.

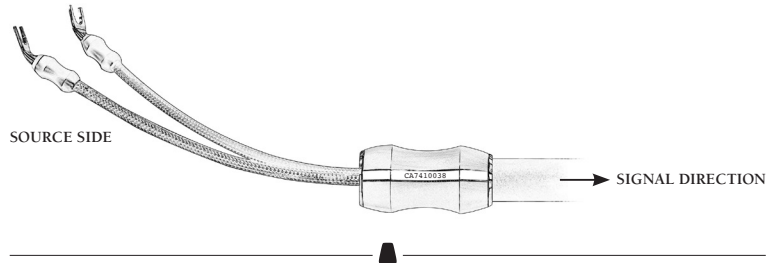

The Silver and Nano-Carbon conductors (SNC™) combined with the individually chambering of these conductors, makes it possible to meet these expectations in all three cable collections. The sonic difference between the three collections is in the amount of precious metal that is used in the cable, the purity of the materials used, the labour to increase the conductors, the amount of shielding, and the proprietary tempering's and treatments we apply to the conductors. Guaranteed all very audible with the appropriate system.

As with any high quality product, special care must be taken to install and operate your new cables. Please read this manual carefully and completely prior to installation.

## CONNECTING INSTRUCTIONS

- ▲ When removing Kharma cables from audio equipment, only apply force on the plug or casing. Not on the cable it-self.
- ▲ After connecting a Kharma cable, it is best to move the cable as little as possible.
- ▲ Beware not to bend or twist a Kharma cable in a forced manner.
- ▲ Do not connect or disconnect any cable while the power of any component is still on.
- ▲ The signal direction for an interlink or loudspeaker cable can be recognized by the side where the serial number is engraved on the cable ending. The source side comes with a serial number on the cable ending.

## SPECIAL CARE & BURN-IN

For the Exquisite and Enigma Veyron Cable Collection please be aware that we have used genuine leather for the sleeves. A conditioner or cream can be used to moisturize the leather and prevent little cracks over time. Waterproofing of the leather sleeves is not necessary.

Every Kharma cable requires a burn-in period, which is needed to reach the maximum results of your Kharma product. You can make use of the included "Kharma Calibration & Test CD" to burn-in your system.

## TROUBLESHOOTING

If you have any problem with your Kharma product, please contact the authorized Kharma-dealer from whom you purchased the cable. They will assist you to their best knowledge.

## WARRANTY COVERAGE

Kharma International guarantees the proper mechanical and electrical functioning of its products for a period of 5 years. In case of malfunction the customer has to present the Kharma product in its original packing to an authorized dealer.

If qualified service appears inevitable, the dealer will ship the product to an appointed service station or to the factory, depending on the required service.

This warranty includes parts and labour. This warranty is not automatically transferable.

## WARRANTY EXCLUSIONS

1. Transportation damage, visible or hidden. Damage should be reported immediately to the transport company. Registration of the complaint should be sent to the Kharma dealer as well.
2. Scratches in metal or leather surfaces of the product. Complaints should be registered at the dealer within three days after the sale.
3. Damage due to illicit handling and inappropriate use.
4. Transportation costs to service station or factory.
5. Damage through unauthorized repair and or modification.
6. Subsequent damage to other appliances.
7. Refund of costs in case of unauthorized repair.
8. Malfunctions caused by use for commercial or professional purposes.
9. All claims on Kharma products obtained through unauthorized sources, with or without correct serial numbers.

## CERTIFICATE OF AUTHENTICITY

Each Kharma cable comes with an official Certificate of Authenticity. This is a credit card-sized proof that your cable is handcrafted in the Netherlands by dedicated specialists. The serial number and product name should match with the serial number on the cable.

Kharma guarantees this cable is made in conformity with our brand values and meets our high quality standards. We hope you enjoy your Kharma product.
