

### **D600B DIGITAL ACTIVE LOUDSPEAKER**

The Meridian D600 loudspeaker combines loudspeaker, full amplification, source selections and display in one compact elegant package, becoming the center point of a state-of-the-art music system. Over a decade of active loudspeaker experience is combined with the latest remote control technology, resulting in a unique new approach to home Hi Fi.

#### General Description

The D600 is a 3-way active loudspeaker. An internal electronics package includes 3 X 70 watt amplifiers, electronic crossover, input switching, electronic volume control, and Digital to Analog (D to A) converter. The D600 accepts analog, digital and digital optical inputs in all consumer and professional formats. User convenience is enhanced via Infra-Red remote control of volume, balance, tone, and input selection. The D600 also remotely controls Meridian CD players and FM tuners in a single room system or as part of a Meridian multiroom system. Each loudspeaker includes a display of selected input, volume, CD track and time, and FM preset and frequency.
