10. The following are the components of the cost of a finished product:
 (i) Direct material cost, Rs. 100
 (ii) Direct labour cost, Rs. 200
 (iii) Overhead cost, Rs. 100

Calculate the selling price of the product if the profit is 20% on the selling price.

11. The following are the components of the cost of a finished product:

- (i) Direct material cost, Rs. 100
- (ii) Direct labour cost, Rs. 200
- (iii) Overhead cost, Rs. 100

Calculate the selling price of the product if the profit is 20% on the selling price.

 (i) Direct material cost, Rs. 100
 (ii) Direct labour cost, Rs. 200
 (iii) Overhead cost, Rs. 100

Exercise 10

1. The following are the components of the cost of a finished product:

- (i) Direct material cost, Rs. 100
- (ii) Direct labour cost, Rs. 200
- (iii) Overhead cost, Rs. 100

Calculate the selling price of the product if the profit is 20% on the selling price.

2. The following are the components of the cost of a finished product:
 (i) Direct material cost, Rs. 100
 (ii) Direct labour cost, Rs. 200
 (iii) Overhead cost, Rs. 100

Calculate the selling price of the product if the profit is 20% on the selling price.

Exercise 11

1. The following are the components of the cost of a finished product:

- (i) Direct material cost, Rs. 100
- (ii) Direct labour cost, Rs. 200
- (iii) Overhead cost, Rs. 100

Calculate the selling price of the product if the profit is 20% on the selling price.

13. The following are the components of the cost of a finished product:
 (i) Direct material cost, Rs. 100
 (ii) Direct labour cost, Rs. 200
 (iii) Overhead cost, Rs. 100

Starting off with 2011

Opening

Inventory is a current asset and is reported on the balance sheet. It is reported at the lower of cost or market.

Costing method

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

- 1. First-in, first-out (FIFO) method

Inventory

Market value limits

The market value is the current replacement cost, net of any discounts, less a normal profit margin.

Inventory

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

- 2. Last-in, first-out (LIFO) method

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

- 3. Average cost method

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

Multi-period inventory

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

Inventory valuation

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

Inventory is reported at the lower of cost or market. The cost is determined by the method used.

Modeling a forest stand

1. **Model** a stand with one tree in each cell.
2. **Model** a stand with one tree in each cell.

Plotting stands in a stand

1. **Plot** stands in a stand.

Counting stand in a stand

1. **Count** stands in a stand.
2. **Count** stands in a stand.
3. **Count** stands in a stand.

Changing the stand

The stand is a stand with one tree in each cell.

1. **Change** the stand.

The stand is a stand with one tree in each cell.

- **Change** the stand.
- **Change** the stand.
- **Change** the stand.

The stand is a stand with one tree in each cell.

Change the stand.

Change the stand.

The stand is a stand with one tree in each cell.

The stand is a stand with one tree in each cell.

Change the stand.

Change the stand.

The stand is a stand with one tree in each cell.

Change the stand.

Exodus is the second book of the Bible. It tells the story of the Israelites leaving Egypt and receiving the Ten Commandments.

The Bible is a collection of books written by different authors at different times and places. It is a collection of books written by different authors at different times and places.

Matthew

Matthew is the first of the four Gospels. It tells the life and teachings of Jesus.

Matthew is the first of the four Gospels. It tells the life and teachings of Jesus.

Matthew is the first of the four Gospels. It tells the life and teachings of Jesus.

Matthew is the first of the four Gospels. It tells the life and teachings of Jesus.

Second Reading

Second Reading is the second of the four Gospels. It tells the life and teachings of Jesus.

Second Reading is the second of the four Gospels. It tells the life and teachings of Jesus.

Second Reading is the second of the four Gospels. It tells the life and teachings of Jesus.

John

John is the fourth of the four Gospels. It tells the life and teachings of Jesus.

John is the fourth of the four Gospels. It tells the life and teachings of Jesus.

1. The following table shows the number of people who attended a concert in each of the years 2008 to 2012.

Table 1: Number of people attending a concert

The number of people attending the concert in each year is given by x .

1. Find the mean number of people attending the concert in each year. Give your answer to 2 decimal places.

2. Find the standard deviation of the number of people attending the concert in each year. Give your answer to 2 decimal places.

Table 2: Number of people attending a concert

The number of people attending the concert in each year is given by x . The number of people attending the concert in each year is given by y .

1. Find the mean number of people attending the concert in each year. Give your answer to 2 decimal places.

Table 3: Number of people attending a concert

The number of people attending the concert in each year is given by x .

1. Find the mean number of people attending the concert in each year. Give your answer to 2 decimal places.

2. Find the standard deviation of the number of people attending the concert in each year. Give your answer to 2 decimal places.

3. Find the variance of the number of people attending the concert in each year. Give your answer to 2 decimal places.

Table 4: Number of people attending a concert

The number of people attending the concert in each year is given by x . The number of people attending the concert in each year is given by y .

1. Find the mean number of people attending the concert in each year. Give your answer to 2 decimal places.

2. Find the standard deviation of the number of people attending the concert in each year. Give your answer to 2 decimal places.

3. Find the variance of the number of people attending the concert in each year. Give your answer to 2 decimal places.

4. Find the coefficient of variation of the number of people attending the concert in each year. Give your answer to 2 decimal places.

5. Find the coefficient of skewness of the number of people attending the concert in each year. Give your answer to 2 decimal places.

6. Find the coefficient of kurtosis of the number of people attending the concert in each year. Give your answer to 2 decimal places.

Operational activities

On the 20th June 2004

0600	Wake
0615	Get to work for work duties
0630	Start working on the first machine
0645	Start the first change
	0700
	Start working on
	second machine and change through
	third and fourth
0800	Finish work for the day
0815	Start working on the second
0830	change and change through to the third
	change
0845	Start working on the third
0900	change and change through
	to the fourth

On the 21st June 2004 (Monday) and 22nd June 2004 (Tuesday)

On all days, the following activities were performed:

0600	Wake
0615	Get to work for work duties
0630	Start working on the first machine
0645	Start the first change
	0700
	Start working on
	second machine and change through
	third and fourth
0800	Finish work for the day
0815	Start working on the second
0830	change and change through to the third
	change
0845	Start working on the third
0900	change and change through to the fourth
	change
0915	Start working on the fourth
0930	change and change through
	to the fifth

Accounting for Income Tax

What are the accounting entries for the following transactions? Assume that the company is a corporation.

1. The company has a net operating loss of \$100,000 for the year. The company has a net operating loss carryover of \$50,000 from the previous year. The company has a net operating loss carryforward of \$50,000 for the current year.

Accounting for Income Tax

1. The company has a net operating loss of \$100,000 for the year. The company has a net operating loss carryover of \$50,000 from the previous year. The company has a net operating loss carryforward of \$50,000 for the current year.
2. The company has a net operating loss of \$100,000 for the year. The company has a net operating loss carryover of \$50,000 from the previous year. The company has a net operating loss carryforward of \$50,000 for the current year.

Journal Entry

1. Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000
2. Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

Journal Entry for the following transactions. Assume that the company is a corporation.

1. The company has a net operating loss of \$100,000 for the year. The company has a net operating loss carryover of \$50,000 from the previous year. The company has a net operating loss carryforward of \$50,000 for the current year.
2. The company has a net operating loss of \$100,000 for the year. The company has a net operating loss carryover of \$50,000 from the previous year. The company has a net operating loss carryforward of \$50,000 for the current year.

Journal Entry for the following transactions. Assume that the company is a corporation.

Journal Entry

Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

Journal Entry for the following transactions. Assume that the company is a corporation.

1. Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

Journal Entry

Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

- Debit Income Tax Expense 100,000
- Credit Income Tax Payable 100,000

Journal Entry for the following transactions. Assume that the company is a corporation.

1. Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

Journal Entry for the following transactions. Assume that the company is a corporation.

Journal Entry

Debit Income Tax Expense 100,000
Credit Income Tax Payable 100,000

Journal Entry for the following transactions. Assume that the company is a corporation.

Controlling output types

Use the following code to create the following output:

- `print` a table with 3 columns
- `print` a table with 3 columns and 2 rows and 2 columns with 1 row
- `print` a table with 3 columns
- `print` a table with 3 columns and 2 rows

Remember to use `print` method for other tables as well.

Type	Number of columns	Number of rows
Table with 3 columns	3	1
Table with 3 columns and 2 rows	3	2
Table with 3 columns and 2 rows and 2 columns with 1 row	3	2
Table with 3 columns	3	1
Table with 3 columns and 2 rows	3	2

Controlling types

1. Use `print` to print the following table (remember to use `print` method)
2. Use `print` to print the following table (remember to use `print` method)
3. Use `print` to print the following table (remember to use `print` method)

- `print` a table with 3 columns
- `print` a table with 3 columns and 2 rows
- `print` a table with 3 columns and 2 rows and 2 columns with 1 row

Output: The output should be as follows:

```

1 2 3
4 5 6
7 8 9
10 11 12
13 14 15
16 17 18

Estimating using Rounding

Problem
 Find 100×100

How to use Rounding

1. **Round** the numbers to the nearest 100.
 $100 \times 100 = 10000$

The Answer is:

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Check: $100 \times 100 = 10000$

Problem: Estimate the number of items in the box.

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Check: $100 \times 100 = 10000$

Problem: Estimate the number of items in the box.

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Check: $100 \times 100 = 10000$

Problem: Estimate the number of items in the box.

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Check: $100 \times 100 = 10000$

Problem: Estimate the number of items in the box.

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Check: $100 \times 100 = 10000$

Problem: Estimate the number of items in the box.

1. **Round** the numbers to the nearest 100 and estimate.
 $100 \times 100 = 10000$

Accounting for manufacturing

Answer the following questions on standard costing and the labour variance. (10 marks)

1. What is a standard cost? Give two examples.

(2 marks)

2. Explain the term 'overhead absorption rate'.

Answer the following questions on standard costing and the labour variance. (10 marks)

1. What is a standard cost? Give two examples.

(2 marks)

2. Explain the term 'overhead absorption rate'.

(2 marks)

3. Explain the term 'overhead absorption rate'.

4. Explain the term 'overhead absorption rate'.

Answer the following questions on standard costing and the labour variance. (10 marks)

1. What is a standard cost? Give two examples.

(2 marks)

2. Explain the term 'overhead absorption rate'.

(2 marks)

3. Explain the term 'overhead absorption rate'.

(2 marks)

4. Explain the term 'overhead absorption rate'.

(2 marks)

5. Explain the term 'overhead absorption rate'.

(2 marks)

6. Explain the term 'overhead absorption rate'.

(2 marks)

7. Explain the term 'overhead absorption rate'.

(2 marks)

8. Explain the term 'overhead absorption rate'.

(2 marks)

9. Explain the term 'overhead absorption rate'.

(2 marks)

10. Explain the term 'overhead absorption rate'.

(2 marks)

Examining 800

Examine the data of the following table to answer the question.

- 1. 1000
- 2. 10000
- 3. 100000
- 4. 1000000
- 5. 10000000

Multiple choice question

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

Answer: The correct answer is 10000000.

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

- 1. 10000000000
- 2. 1000000000
- 3. 100000000
- 4. 10000000
- 5. 1000000

Multiple choice question

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

- 1. 10000000000
- 2. 1000000000
- 3. 100000000
- 4. 10000000
- 5. 1000000

Answer: The correct answer is 10000000.

Answer: The correct answer is 10000000.

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

Answer: The correct answer is 10000000.

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

Multiple choice question

SELECT * FROM EMPLOYEE WHERE EMPLOYEE_ID < 10000000
How many rows will be returned?

Answer: The correct answer is 10000000.

Multiple choice questions

1. The following are the components of a contract, except for:
 a) Offer and acceptance
 b) Consideration
 c) Intention to create legal relations
 d) Capacity of the parties

2. Which of the following is not a contract?
 a) A contract of sale
 b) A contract of carriage
 c) A contract of insurance
 d) A contract of marriage

3. The following are the elements of a contract, except for:
 a) Offer and acceptance
 b) Consideration
 c) Intention to create legal relations
 d) Capacity of the parties

4. Which of the following is not a contract?
 a) A contract of sale
 b) A contract of carriage
 c) A contract of insurance
 d) A contract of marriage

Short-answer questions

1. Explain the concept of a contract. What are the essential elements of a contract? Discuss the legal consequences of a contract.

Multiple choice questions

1. Which of the following is not a contract?
 a) A contract of sale
 b) A contract of carriage
 c) A contract of insurance
 d) A contract of marriage
2. Which of the following is not a contract?
 a) A contract of sale
 b) A contract of carriage
 c) A contract of insurance
 d) A contract of marriage

Short-answer questions

1. Explain the concept of a contract. What are the essential elements of a contract? Discuss the legal consequences of a contract.
2. Explain the concept of a contract. What are the essential elements of a contract? Discuss the legal consequences of a contract.

Multiple choice questions

Short-answer questions

1. Explain the concept of a contract. What are the essential elements of a contract? Discuss the legal consequences of a contract.

Multiple choice questions

1. Which of the following is not a contract?
 a) A contract of sale
 b) A contract of carriage
 c) A contract of insurance
 d) A contract of marriage

4. **Inventory** is **not** a liability. It is the value of the goods that a company has on hand, or that are in transit, or that are in the process of being produced. It is **not** a liability because it is not a debt or obligation of the company.

5. **Inventory** is **not** a liability. It is the value of the goods that a company has on hand, or that are in transit, or that are in the process of being produced. It is **not** a liability because it is not a debt or obligation of the company.

What is the correct answer to the question: "Inventory is a liability?"

Answer: No, Inventory is not a liability.

- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.

What is the correct answer to the question: "Inventory is a liability?"

- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.

What is the correct answer to the question: "Inventory is a liability?"

- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.
- Inventory is a liability because it is a debt or obligation of the company.

The right answer is the opposite of what you should expect! Instead of increasing, it will decrease. You have to double your effort and work longer hours.

ANSWER: D **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

What is the correct answer?

ANSWER: D **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

Another question about

ANS:

1. **ANSWER: D** **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

ANS:

2. **ANSWER: D** **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

3. **ANSWER: D** **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

ANSWER: D **EXPLANATION:** The correct answer is D. The correct answer is D. The correct answer is D. The correct answer is D.

Image

Identifying image events

Using the `Image` class:

1. `Image` will create an instance in the `Image` class in the `Image` class.
2. The `Image` class will create an instance in the `Image` class in the `Image` class.
3. The `Image` class will create an instance in the `Image` class in the `Image` class.

How to identify

Identifying the image events is a simple task. The `Image` class will create an instance in the `Image` class in the `Image` class.

Using the `Image` class:

1. `Image` will create an instance in the `Image` class in the `Image` class.
2. The `Image` class will create an instance in the `Image` class in the `Image` class.
3. The `Image` class will create an instance in the `Image` class in the `Image` class.

How using the `Image` class

The `Image` class will create an instance in the `Image` class in the `Image` class. The `Image` class will create an instance in the `Image` class in the `Image` class.

How using the `Image` class

The `Image` class will create an instance in the `Image` class in the `Image` class. The `Image` class will create an instance in the `Image` class in the `Image` class.

How using the `Image` class

The `Image` class will create an instance in the `Image` class in the `Image` class. The `Image` class will create an instance in the `Image` class in the `Image` class.

How using the `Image` class

The `Image` class will create an instance in the `Image` class in the `Image` class. The `Image` class will create an instance in the `Image` class in the `Image` class.

- The `Image` class will create an instance in the `Image` class in the `Image` class.
- The `Image` class will create an instance in the `Image` class in the `Image` class.
- The `Image` class will create an instance in the `Image` class in the `Image` class.

The `Image` class will create an instance in the `Image` class in the `Image` class. The `Image` class will create an instance in the `Image` class in the `Image` class.

The `Image` class will create an instance in the `Image` class in the `Image` class.

1. Use a straightedge to draw a line through the origin.

2. Draw a line perpendicular to the line through the origin.

3. Repeat steps 1 and 2 for several other lines.

4. What do you notice about the lines you draw?

5. Write a conjecture about the lines you draw.

6. Draw a line through the origin.

7. Draw a line perpendicular to the line through the origin.

8. Repeat steps 6 and 7 for several other lines.

9. What do you notice about the lines you draw?

10. Write a conjecture about the lines you draw.

11. Draw a line through the origin.

12. Draw a line perpendicular to the line through the origin.

13. Repeat steps 11 and 12 for several other lines.

14. What do you notice about the lines you draw?

15. Write a conjecture about the lines you draw.

16. Draw a line through the origin.

17. Draw a line perpendicular to the line through the origin.

18. Repeat steps 16 and 17 for several other lines.

19. What do you notice about the lines you draw?

20. Write a conjecture about the lines you draw.

21. Draw a line through the origin.

22. Draw a line perpendicular to the line through the origin.

23. Repeat steps 21 and 22 for several other lines.

24. What do you notice about the lines you draw?

25. Write a conjecture about the lines you draw.
