

# G07 24-bit Compact Disc Player

**DAC rated at 192 kHz, 24-bit for maximum analogue performance**

**Superb sound quality via Class A analogue or digital outputs**

**Digital output for direct connection to Meridian DSP Loudspeakers**

**S/PDIF coax and TOSLink optical digital outs for high-quality replay**

**Developed from the award-winning 508 player**

**COMPACT

*Meridian's G Series line of high performance digital & analogue consumer audio components feature a stylish cabinet design in traditional black or a sleek silver finish.*

*Designed to be either free-standing or rack-mounted, G Series components build on their predecessors, the multi-award-winning 500 and our flagship 800 Series, and include entirely new circuitry developed specifically for the G Series.*

*Multi-layer boards reduce system noise and improve performance. In products which include video capabilities, broadcast-quality, wide-bandwidth video components are employed for maximum image integrity.*

*G Series units are easy to use. Where appropriate, a knob is included to control volume. The positive-action front-panel keys are software-defined: their legends are presented in the vacuum fluorescent display and change intelligently according to context.*

*Full installation configuration of many G Series components is achieved by running a special setup program on a Windows computer, connected to the G Series unit via a serial link, or direct from the front panel.*

*G Series products also include serial ports for remote operation and configuration, along with infra-red sensor input and trigger capabilities, plus Meridian communications ports. A comprehensive back-lit learning/programmable remote is included with products other than amplifiers.*

Meridian built the world's first audiophile CD player in 1984 and the first two-unit transport and converter in 1986; and has been leading the way ever since. We have to date received over 50 major industry awards for our CD players. Meridian's G07 CD Player is a superb, cost-effective introduction to the G Series line. Its heritage lies in the 508, which won over 20 awards, including a Class 'A' rating from Stereophile, and it takes cues from the astonishing 800 player, for which the Class 'A+' rating was specially added!

Inside the G07 you'll find advanced design – both digital and analogue. Multi-layer PCBs, four separate power supplies, the latest surface-mount technology and carefully-selected audiophile-quality components – and of course, Meridian's signature quality design and manufacturing.

The latest laser transport assembly is utilised in the G07, and is optimised for CD, CD-R and CD-RW playback. In addition, the player will replay hybrid discs such as the CD layer of an SACD, as well as DTS CDs for external decoding via the digital outputs.

The G07 maximises audio quality by reducing jitter to extremely low levels, for a smooth open, well-defined sound and pinpoint stereo imaging. This is achieved by re-clocking the digital outputs and by a superb direct-coupled audiophile-quality output stage.

# G07 24-bit Compact Disc Player

G07 rear panel – silver model shown

## Outline Specifications

<b>THD:</b>	Better than -93dBFS
<b>Noise:</b>	Better than -93dBFS
<b>Mechanism:</b>	Triple-beam laser
<b>Converters:</b>	192kHz-capable (operating at CD sample rate of 44.1kHz), 24-bit, Delta Sigma
<b>Outputs:</b>	Analogue: 1 unbalanced on phono, 2.3V rms fixed, Class A, 47Ω impedance; Digital: S/PDIF (IEC60958), coax and Toslink optical
<b>Formats:</b>	CD Audio (CD-DA), CD-R, CD-RW
<b>Comms:</b>	Two 5-pin 240° DIN sockets, BNC socket and RS232 remote/configuration interface
<b>Construction:</b>	Meridian black or silver finish in metal & glass
<b>Dimensions:</b>	Width: 440mm (17.32in); Depth: 350mm (13.78in) plus connectors; Height: 90mm (3.54in)
<b>Rack Mounting:</b>	Kit available from Meridian authorized dealers
<b>Weight:</b>	8 kg (17.6 lbs)

<b>Controls:</b>	Front-panel soft keys include Play, Stop, Pause, Previous, Next, etc. Buttons for On/Off, Open, Display. Full remote control of all features via MSR+. Meridian Comms (2 x DIN 240° and BNC), IR in and RS232
<b>Display:</b>	Multi-character dot-matrix Vacuum Fluorescent Display
<b>Power:</b>	Versions for 100, 100-120, 220-240Vac, 50/60Hz, 25VA

The player utilises 192 kHz, 24-bit digital to analogue converters for the very highest analogue quality, while the internal circuitry includes a superb analogue design to complement the high-spec DACs and delivering 2V rms with less than -95dB noise and distortion.

The result is dramatically improved stereo imaging, and a clear, open and authoritative sound. Both S/PDIF coaxial and TOSLink optical digital outputs are provided, and all audio cable interfaces are via gold-plated connectors.

An RS232 serial port is provided for remote control operation. This port can be used to update the G07's system software, thanks to Flash ROM storage.

The G07 is supplied with the Meridian System Remote Plus backlit remote control. This controller not only operates all remotable Meridian products; it can also be used to control the vast majority of components from other manufacturers, thanks to its built-in product library that includes literally hundreds of manufacturers. And if a product is not in the database, it can be added via the remote's learning function.

The G07 is an ideal player for many applications, such as an integrated analogue stereo system (see diagram above) comprising the G07 CD player and the G51 receiver, while the G07's coaxial digital outputs will drive Meridian DSP loudspeakers directly to form a superb quality all-digital stereo CD replay system.
