

From the Minds of Mirage

*Mirage made Bipolar
sound a success over
a decade ago...and is the
originators of Omnipolar, a
breakthrough in loudspeaker
design now revolutionizing
the home entertainment
industry.*

*Now with Oasis, Mirage
offers its trademark great
sound in a smaller, tougher,
weather-proof package...
for some pretty wild
locations.*

Hot Sound

that can stand up
to a *cold shower.*

OASIS

Mirage[®]

*Sound beyond
your wildest dreams!*

New All-Weather Speaker

from Mirage.

You've got your house wired for great sound. You've got a great audio system in your car. But that's not enough, is it? No, it's never enough...not for the true music-lover.

Now you want to take your music outdoors...to that backyard patio...or maybe aboard your boat. The answer is not only blowing in the wind...it's standing up to the toughest conditions...in the new Oasis All-Weather Speakers from Mirage.

With Oasis you can create your own musical oasis outdoors or in, rain or shine. A refuge from the rest of the world, with sound that's better than you ever dreamed of.

Never Mind The Weather

With a contoured cabinet design in a black or white finish, Oasis speakers install discreetly under eaves or in tight corners, complementing any decor.

Once they're up, you can forget about them. Stainless steel/brass hardware combined with a rugged, weather-resistant enclosure makes Oasis ideal for trouble-free outdoor use in any condition ranging from -50F to 200F.

And that pretty much covers climates ranging from January in Anchorage to July in Death Valley.

High Performance, High Endurance

Oasis incorporates a weather-resistant dome tweeter designed to faithfully reproduce extended high frequency sounds.

Paired with it is an injection-molded 5-1/4" woofer, also weather-resistant, for impeccable accuracy in the mid and deep bass frequencies.

A unique indoor-outdoor equalization switch is designed to compensate for the extreme acoustical differences between the two environments — producing the increased bass impact and power handling necessary for the open-air setting.

A snap-on terminal cover protects the critical amplifier-to-speaker connections from weather-induced corrosion. The result is performance that's guaranteed year in and year out.

You'll Find An Oasis Anywhere

Oasis has a rugged, stainless steel mounting bracket that allows for horizontal or vertical wall installations, or can be equipped with an optional swivel mount that lets you easily adjust and direct the sound to the desired listening area.

The speaker's gold-plated 5-way binding posts are corrosion-resistant terminals designed to hook up with any of the conventional wire connectors.

Back patios or front porches. Garages or workshops. Summer places or winter retreats. Even your boat if you're looking for a little high fidelity on the high seas. Wherever you want great sound, you want Oasis.

Preliminary Specifications

Model:	Mirage Oasis
System Type:	Two way acoustic-suspension, all weather loudspeaker
Tweeters:	1/2" (13 mm) Dome
Woofer:	5 1/4" (13.5 cm) Injection molded-cone / rubber suspension
Room Sensitivity:	89 dB
Crossover Point:	2.2 KHz
Frequency Response:	50KHz - 22KHz
Nominal Impedance:	8 ohms nominal
Recommended Amplifier Power:	5 - 100 watts per channel
Dimensions (HxWxD):	7" x 10" x 6 1/2" (18 x 25.4 x 16.6 cm)
Weight:	6 1/2 lbs (2.9 kg) each
Finish:	Black or White
Temperature Extremes:	-50° to 200°F (-45° to 93°C) Exceeds military standard 883D
