PIEGA AP/AS Series

The new universal loudspeaker

AP 3/AS 3

The AP 3 and AS 3 loudspeakers are top quality loudspeakers that are the ideal solution for use in combination with flat screens. Thanks to their distinctive design and their intelligent styling and equipment, the AP/AS loudspeakers can be used in a host of different variations.

The loudspeakers are the right choice for both stereo operation and home cinema applications. No wonder that the audio press wrote the following: "This set has the power, the pace, the magic, the lightness – Switzerland's smallest yet finest peaks." This naturally speaks for itself. Ideally suited to wall-mounted use, AP 3 and AS 3 can be fitted in both on-wall and in-wall installation. Your specialist dealer will be glad to explain all the necessary details.

Thanks to the unique MDS[®], technology (Maximum Displacement Suspension) of the new bass chassis, these stylish loudspeakers are sure to impress. The accurately dimensioned aluminum cabinet, in combination with the neodymium dome and precision-designed frequency crossover, makes a good impression with the absolutely natural musical integrity of even the most complex pieces. Furthermore, the AP 3 even uses a genuine PIEGA LDR ribbon tweeter inside.

The loudspeakers can be mounted both vertically and horizontally without any loss in quality. They are therefore ideal as center speakers, above or below a flat screen. When combined with an active subwoofer (such as the P SUB 4), they can create acoustic dimensions that will leave you lost for words. Totally captivated by the enthralling musical integrity of their new music system, listeners are ensured hours of enjoyable relaxation.

AP 3

AS 3
