

PLINIUS  
THE HEART OF MUSIC

SA-201  
POWER  
AMPLIFIER

# SA-201 POWER AMPLIFIER

Often we hear of technology developed for a premium model being transferred to other products within a line. While this does have some validity usually there are compromises made to allow this technology to appear in sibling models.

Following on the tremendous success of the Odeon we thought that it would be worthwhile to capture the sonic magic of the Odeon and make it more readily available in a two channel package.

We have been aware for some time now that we can get frighteningly close to Class A operation with a Class AB design.

The Odeon proved this and not being happy to just rely on Odeon technology we have created a two channel amplifier, the PLINIUS SA-201, that uses two exact Odeon modules in a smaller chassis. The power supply is similar to the Odeon and uses two very large toroidal transformers connected in parallel. The same attention to detail is maintained and internally the SA-201 is both elegant and functional.

The PLINIUS SA-201 will deliver 225 Watts per Channel and in keeping with all PLINIUS amplifiers is not distressed by difficult to drive speaker systems.

We have elected to keep the SA name for this model as it represents a premium quality amplifier that shares a close sonic and value pedigree with our top range amplifiers.

The distinctive styling of the PLINIUS SA-201 will allow its inclusion in both traditional and contemporary settings while providing the level of performance that is a PLINIUS hallmark.

## Specifications For Plinius SA-201

### Power

225 watts continuous per channel into 8 ohms  
Both channels driven from 20Hz to 20kHz

### Frequency Response

20Hz to 20kHz  $\pm 0.2$ dB  
-3dB at 1Hz and -3dB at 70kHz

### Distortion

Typically <0.05% THD at rated power  
0.1% THD and IM worst case  
prior to clipping

### Current Output

40A short duration peak per channel  
Fuse protected

### Rise Time

Typically < 4 $\mu$ S

### Hum & Noise

90dB below rated output 20Hz  
to 20kHz unweighted

### Input Impedance

47,000 ohms

### Gain on RCA Inputs

32dB

### Gain on balanced Inputs

38dB

### Dimensions

Height: 170mm (7 1/2")  
Width: 445mm (17 3/4")  
Depth: 453mm (17 3/4")  
Weight: 25kg (56lbs)

### Colour

Available in silver or black
